Metal-free Dental Prosthesis with Ceramic Implants

Biocompatible

EXCELLENT BIOCOMPATIBILITY

Ceramic implants from SDS SWISS DENTAL SOLUTIONS are superbly compatible and heal as firmly into the bone as a natural tooth.

Durable

EXTREME DURABILITY

Ceramic implants from SDS SWISS DENTAL SOLUTIONS are designed to last a lifetime - in most cases even better than your own teeth. Ceramic implants will never experience caries nor suffer from nerve inflammation.

Aesthetic

FOR YOUR WELL-BEING

Ceramic implants from SDS SWISS DENTAL SOLUTIONS are naturally white. They combine the highest esthetics with optimal health - for the most beautiful smile as well as maximum quality of life.

Shorter treatment time

IMMEDIATE IMPLANT PLACEMENT

Ceramic implants from SDS SWISS DENTAL SOLUTIONS and the unique protocol are designed to allow teeth to be extracted and ceramic implants to be placed immediately within one session - without any loss of time.

Comprehensively metal-free

CERAMICS ARE HEALTHIER

The use of metals in the oral cavity can have a negative effect on the entire body. Since ceramic is a body-friendly material, ceramic implants from SDS SWISS DENTAL SOLUTIONS are excellently tolerated and 100 percent biocompatible.

Stability and aesthetics

NO DARK MARGINS

The light color of SDS SWISS DENTAL SOLUTIONS ceramic implants eliminates unwanted gray margins at the gum line or metal gleaming through as with titanium implants.

Little to no pain

PRE AND POST TREATMENT

Patients report little to no pain following implant placement of SDS SWISS DENTAL SOLUTIONS ceramic implants, due in part to the unique medical support protocol.
