WORLD MARKET LEADER IN DENTAL CERAMIC IMPLANTS

CONTINUING EDUCATION PROGRAM
2022/2023
As the world market leader for CERAMIC IMPLANTS, the biological and immunological aspects are of the highest priority for SDS. SDS is the only company to be double certified for both implant systems: at the production level and also at the manufacturer level! In addition, SDS is the world’s first and only implant company to be accredited by CleanImplant for its full navigation system SDSBOX and its ad hoc navigation system SDSAIM. By the end of 2022, more than 500 SDS user practices will be awarded the CleanImplant „Certified Dentist“ seal. We are taking this route. What about you?
Founded by ceramic pioneer and implantologist Dr. Karl Ulrich Volz, SDS SWISS DENTAL SOLUTIONS offers a comprehensive treatment concept for biological-immunological implant solutions with ceramic implants.

A SAFE SOLUTION BY MEANS OF CERAMIC IMPLANTS
They meet the highest standards in terms of compatibility, health and aesthetics. Regardless of whether titanium intolerance or a general discomfort with metal suggests a metal-free restoration to your patient - the highly aesthetic white ceramic implants made of the biocompatible high-performance material zirconium oxide from SDS SWISS DENTAL SOLUTIONS are the solution.

WHAT MAKES CERAMIC IMPLANTS FROM SDS SO ATTRACTION FOR USERS?
- Biologically oriented dentistry with ceramic implants
- SDS’s Dynamic Thread® enables immediate implant placement in all regions
- World market leader with more than 20 years experience
- Ceramic implant users are growing overdimensionally compared to the general market
- Ceramic implants, augmentation and navigation systems, biological treatment protocol and micronutrient products from a single source

WHO RECOMMENDS CERAMIC IMPLANTS
On September 21, 2021, WHO Chairman Prof. Dr. Thomas Zeltner, former Minister of Health of Switzerland, strongly recommended ceramic implants and advised not to wait another five years, but to use them now - because, according to the WHO Chairman, the data situation is now sufficient.

ZIRCONIA MORE STABLE THAN TITANIUM
The implants from the world market leader SDS are now more stable than any titanium implant with the same diameter.

WHY CERAMIC IMPLANTS FROM SDS?
SDS SWISS DENTAL SOLUTIONS is a highly innovative and fast growing manufacturer of ceramic implants with a focus on excellent education in our in-house SWISS BIOHEALTH EDUCATION CENTER, supported by the expertise of 10 in-house dentists/surgeons working in our own SWISS BIOHEALTH CLINIC, developing and reviewing the concepts and products and then teaching them in the advanced and continuing education courses.
SWISS PRECISION AND RELIABILITY - also in continuing education and training?

ABOLUTELY! SDS SWISS DENTAL SOLUTIONS, the undisputed world market leader for ceramic implants, has created a unique setup in the context of the SWISS BIOHEALTH GROUP to provide you with the SWISS BIOHEALTH EDUCATION CENTER in a healthy, Swiss-stylish, friendly, collegial ambience to give you a new home for your thirst for knowledge and your enthusiasm for your profession.

You want to reach the next level as an implanter and prosthodontist as quickly and effectively as possible by “chunking” courses and learning from the best in each field at a single location?

This is exactly what we offer you at our headquarters in Kreuzlingen, Switzerland, 100 meters from the German border! You know that you can never really absorb the meaning of a book if you only read a few pages a month for a year, so we have bundled each subject area, such as the BONE AUGMENTATION WEEK, into “chunks”, so that you advance day by day and level by level in the respective area over a short span of time to become an absolute professional in the subject of your choice. This is based on the same wisdom as the fact that you will internalize a book much better if you read it in one go over a rainy weekend!
The SOUL vegan café & take away offers our continuing education participants the opportunity to eat healthy and varied food throughout the day, in addition to our catering at lunchtime. The assortment is vegan, gluten-free and sugar-free and consists of a variety of hot and cold bowls, smoothies, mueslis, salads and delicious baked goods. In addition, there is always a freshly prepared soup of the day, fine vegetable quiches, fruit infused water and much more.

As an alternative to refined sugar, we only use coconut sugar, birch sugar and date sugar, all long-chain carbohydrates that not only keep your insulin levels down, but also do not harm your teeth. We avoid the gluten protein in cereals such as spelt, rye and barley and use rice and millet wholemeal flour, buckwheat or cassava flour as substitutes.

At in-person events, you will receive one CHF 25 voucher credit for SOUL per event day, which you can spend as you wish.
In the SWISS BIOHEALTH CLINIC in Kreuzlingen a unique symbiosis of holistic medicine and biologic dentistry has been established. It sets new standards and is one of the most modern and innovative dental practices worldwide. All our products, concepts and techniques are tested and further developed here. As soon as they have proven themselves in daily clinical practice, we share our “best practices” and recommendations in our courses, including indications and tools of the trade.

The unique therapeutic approach, summarized in the SWISS BIOHEALTH CONCEPT, is based on the rapid and comprehensive elimination of all sources of stress and interference fields in the body with the goal of achieving the greatest possible improvement in health, well-being and functionality.

For the subsequent recovery after surgery, a soothing atmosphere is very important. The SWISS BIOHEALTH CLINIC must therefore not only meet the highest medical standards but also exceptional demands in terms of ambience and exclusivity.
THE SWISS BIOHEALTH STUDY CLUB OF NORTH AMERICA offers doctors in North America who are authorized to place SDS implants a monthly web-based e-learning platform on ceramic implantology. SWISS BIOHEALTH CLINIC Oral Surgeon and Specialist in Biologic Dentistry, Dr. Rebekka Hueber hosts programs that cover the science behind ceramic implantology, case studies, technique tips and general information on ceramic implantology.

Members will also enjoy the opportunity to learn from guest presenters on different topics or peers who present case studies. Annual membership includes access to the platform of all prior recorded sessions. CE’s are awarded for attendance.

The Study Club also hosts two In-Person sessions annually for an additional charge. These 2 day meetings deliver up to 26CE’s and are full of topical information to improve all areas of practice.
Monthly, web-based e-learning network on ceramic implantology, discussing case studies, surgery techniques and latest evidence.

STUDY CLUB HOST DR. REBEKKA HUEBER

Dr. Rebekka Hueber is the leader of the dental department and accredited specialist in biologic dentistry at the Swiss Biohealth Clinic in Switzerland. She graduated from the Ludwig-Maximilians-University, Munich, Germany and completed a four-year specialist training for oral surgery, biologic dentistry and zirconia implants.

Dr. Hueber is a well respected international lecturer, key opinion leader, and educator in the application of ceramic implants and biologic dentistry and is an author of several articles and publications in recognized journals.

FUTURE MEETINGS

June 24th-26th – New York City (In-Person)
July 16th
August 13th
September 17th
October 8th
November 11th-12th - San Antonio (In-Person)
December 10th

Start smart and organized with ceramic implants: the SDSACT concept makes it easy
Getting started in ceramic implantology has never been easier than with the SDSACT starter concept! Intelligent simplicity with maximum safety is the focus of this training level. You can handle all situations of late and delayed implant placement with a reduced portfolio of 6 implants, which can be applied in two or one pieces, thus offering you 12 options.

Ceramic implants from the market leader, SDS, offer you the safest option with the proven effectiveness of our Dynamic Thread®, which has been tried and tested hundreds of thousands of times - the perfect solution for standard situations!

In this entry level course, our experienced guest instructors will also introduce you to some of the new technologies emerging that make starting with SDS ceramic implants even easier.

**MICRO EVENTS**

The SDSACT concept is instructed by experienced implantologists with many years experience using SDS CERAMIC IMPLANTS.

**DATES**

September 21, 2022  DALLAS, TX
December 5, 2022  FORT LAUDERDALE, FL
December 7, 2022  ATLANTA, GA
December 9, 2022  CHARLOTTE, NC
ROADSHOW

Expand your portfolio and offer your patients safe immediate implant placement in all regions including the upper molars.
No patient finds it amusing to wait months after an extraction and then have to settle for a suboptimal result due to the atrophied bone, which has occurred during the waiting period. As an „inert“ material, zirconium oxide ceramic has no free electrons on its surface and is therefore far superior to titanium in regards to infections. In addition, the implants from the world market leader SDS with its unique Dynamic Thread® and the special shapes, such as the balcony implant, can be implanted in really all alveoli. Even upper molars have been implanted immediately and successfully by SDS users tens of thousands of times for many years.

In this course you will learn directly from the founder and owner of SDS and the developer of the immediate implantation technique with ceramic implants, Dr. Karl Ulrich Volz, everything biologically and mechanically necessary to successfully implant ceramics in all alveoli immediately! This is where the premium line SDS 1.2_ and 2.2_Bright with some special shapes come into play.

The micronutrient supplementation is a bit more sophisticated at this level and continues to include vitamin C, magnesium and the anti-inflammatory omega three in addition to vitamin D3 and K2. Rounding out this concept is the use of ozone and blood concentrates. Accelerate your protocols and give your patients what they want!

**SDSACC ROADSHOW**

SDS in a city near you! In this course, the founder/owner of SDS and the developer of the immediate implantation technique with ceramic implants, Dr. Ulrich Volz, will teach you everything biologically and mechanically necessary to successfully implant ceramics in all alveoli immediately!

We will welcome you in a sensational location with an extraordinary ambience, where you can get to know us and our portfolio while enjoying an aperitif and finger food, and also make great new contacts.

Learn all you need to know in one evening to start implanting with SDS CERAMIC IMPLANTS immediately. Get inspired and ACCELERATE to the next level. For implant orders placed in-person on these evenings, receive the course fee credited to your order.

*SDSACC - Las Vegas is being offered in cooperation with the ICOI World Congress. It will take place on Nov. 3, 2022 from 8:00 a.m. – 12:00 p.m. To sign up for the ICOI, please use the digital form:
SDS ALL
ALLINONE

Be part of a new way of dentistry oriented on causes and results with a focus on complete solutions
Ceramics and biology are your passion and you want to achieve a health improvement for your patients in addition to the optimal dental result? Here at SDS SWISS DENTAL SOLUTIONS and SWISS BIOHEALTH we are definitely the „world champions“, because no one has treated more, and more successfully, thousands of patients with this concept than Dr. Volz: from chronically ill patients to VIP’s to gold medal winners. All of these successes from over 25,000 ceramic implants personally placed by Dr. Karl Ulrich Volz have made SWISS BIOHEALTH CLINIC the market leader in biomedical dental treatment. The clinic currently employs 10 dentists/surgeons and 5 physicians.

Hundreds of dentists have been trained by Dr. Volz in this forward-looking concept, which has become increasingly important since Corona, and which focuses on the causes of disease and unconditionally demands results. The program has trained over 50 dentists in the curriculum to become „Specialists in Ceramic Implants and Biological Dentistry“ (see page 50). Since the aim of this concept is to work through everything in one session if possible, we call it ALLINONE.

This course is offered exclusively here in Kreuzlingen in our SWISS BIOHEALTH EDUCATION CENTER, because we need the spatial proximity to the “cradle” of the ALLINONE concept: the SWISS BIOHEALTH CLINIC. In this two-day advanced training course, you can expect an equal mix of practical demonstrations, workshops and hands-on sessions. Dr. Volz explains in theory and practice the basics of biologic dentistry, such as the easily verifiable connections between oral interference fields and organs, the stresses caused by root-treated teeth, titanium implants and chronically fatty-degenerative jaw areas, so-called „NICO“ (Neuralgia Inducing Cavitational Osteonecrosis according to Prof. Bouquot). For such comprehensive ALLINONE interventions, we determine not only the D3 but also the LDL value in order to reduce the risk of complications. This is done, among other things, with the professional and comprehensive micronutrient concept BASELINE and BOOST. We additionally safeguard these invasive procedures by the use of infusions, i.V. cortisol and antibiotic administration, and prevent pain and swelling with the Hilotherm cooling mask. In the ALLINONE concept, we pull out all the stops implantologically and make use of the entire 1.2 and 2.2 portfolio including the double balconies, the shorties and the sinus implants.

On the first day, an extensive ALLINONE live surgery will be performed in parallel to the course, and this will be shown repeatedly. On the practice-oriented second day, the course for assistants will take place at the same time, so that you can practice with your team directly and close to reality.
2-DAY IN-PERSON COURSE

- Basics of biological dentistry
- The proven THE SWISS BIOHEALTH CONCEPT
- Thinking in ceramics: the special properties of zirconia
- Biological implant shapes and prosthetics on SDS implants
- The ALLINONE concept
- Before/after case presentations including extensive bone augmentations
- Parallel live surgery transmission from the SWISS BIOHEALTH CLINIC
- Practical demonstrations, workshops and hands-on sessions
- Practical approach with involvement of the assistants

PARTICIPATION REQUIREMENTS
Participation in SDSALL requires prior participation in a SDSACT and/or SDSACC course.

In addition, please watch Part 3 of „The Longevity Code“ on our YouTube channel before attending the course. The topics micronutrients, minerals and vitamins („Fantastic Four and More“) are explained there in detail.

DATES
Oct. 12–13, 2022 (Bilingual)
Oct. 11–12, 2023 (Bilingual)

COURSE HOURS
Daily 9:00 a.m. - 5:00 p.m.
Dinner together on the first evening

INSTRUCTOR
Dr. Karl Ulrich Volz

COURSE FEE
for Dentists 550 €
for Assistant Dentists 500 €
for Dental Assistants & Students 500 €

BOOKING
The following QR code will take you directly to the registration via our website:
ONLINE COURSE
For those of you who are in a hurry or who simply don’t have much time, Dr. Volz has shortened the most important elements of his SDSALL course to 3 hours and incorporated them into a sensational online course with green-screen technology, which you can register for quickly and easily on our website. Immediately after the course you have to answer 30 multiple choice questions correctly and you are unlocked to use the SDS implants!

You will receive your access data within 24 hours (on weekends within 48 hours) after receipt of payment to the e-mail address you provided during your registration. Please make sure that you have access to it and check your spam folder if necessary. The online course can be booked and accessed at any time for a 6-month period.

NOTE: For a successful certification you have to answer 70% of the questions correctly.
SHADOWING

Look over the shoulder of our dentists and learn the ALL-INONE & THE SWISS BIOHEALTH CONCEPT at the Swiss Biohealth Clinic in Kreuzlingen.
Dr. Karl Ulrich Volz and his team regularly offer private consultations at the SWISS BIOHEALTH CLINIC. In addition to the operations/implantations, you can also get to know our medical department and various therapies according to the SWISS BIOHEALTH CONCEPT and try them out yourself as a dentist.

The private visits are suitable for both dentists and their assistants to gain the best insights into their respective field of work.

**FOCUS ON SURGERY & PROSTHETICS**

You will accompany our dentists live during the surgeries, see the complete implementation of the SWISS BIOHEALTH CONCEPT including the surgical ALL IN ONE concept, i.e. the complete removal of all interference fields in the oral cavity and the subsequent immediate implantation with SDS zirconium oxide implants and immediate restoration with long-term temporaries.

Treatment days focusing on prosthetic restoration are also offered. You will accompany various steps on the way to the final prosthetics. The perfect incorporation of the superstructures and the optimal adjustment of the occlusion are essential components of the long-term success of restorations with ceramic implants.

**DATES 2022**
- July 5, 2022
- July 12, 2022
- July 19, 2022 (only Dental Assistants)
- August 23, 2022
- August 24, 2022
- September 6, 2022
- September 7, 2022
- September 14, 2022 (only Dental Assistants)
- October 11, 2022
- October 18, 2022
- November 8, 2022
- November 22, 2022
- November 23, 2022 (only Dental Assistants)

**DATES 2023**
All preliminary dates are noted on the first pages in the calendar overview

**COURSE HOURS**
9:00 - 17:00 Uhr

**MENTORS / DENTISTS**
Team of the SWISS BIOHEALTH CLINIC

**COURSE FEE**
- 500 € for Dentists
- 100 € for Dental Assistants

**BOOKING**

**IMPORTANT NOTICE**
Please bring white pants, clean white shoes, and a white t-shirt, polo, or shirt to the job shadowing.
Become an expert in biological dentistry and ceramic implants within a few days.
On previous pages of this continuing education brochure, we introduced the SDS ALLINONE concept and described the benefits you can generate for yourself and your patients with this biologically and immunologically oriented treatment concept! This two-day Level 1 course is the proven way to the „Biological and Implantological Olympus“ par excellence and represents our absolute master course. Therefore, you should definitely take the time to attend levels 2 to 4 of the CERAMIC IMPLANTOLOGY WEEK as an advanced level. Of course, this does not apply to those of you who have been using SDSALL for some time and have already gained extensive experience with SDS ceramic implants.

Also in this intensive training week we will work with you step by step and level by level on the necessary knowledge and make sure that you will always have fun, get everything you need and in no case be bored with things that are unimportant. Since we dentists and implantologists are also craftsmen in a certain way and, due to our haptic inclination, like to apply everything practically right away, we have integrated two hands-on days into the CERAMIC IMPLANTOLOGY WEEK!

LEVEL 1 - SDSALL
You can find all the information on previous pages.

LEVEL 2 - CASE PLANNING
You probably also spend a significant part of your valuable time on implant planning? In principle, this is correct, because good planning reduces the execution time on the patient and prevents failures, surprises or complications. However, we believe that there is still great potential to reduce this effort to a fraction by implementing fixed decision algorithms in your case planning, which we call „painting by numbers“. To give you a simple example: the decision which erupted wisdom tooth can be retained or should better be removed is made by us, our surgeons and our users within one second, exactly according to a fixed algorithm. If the 8 is complete, even distally, surrounded by keratinized gingiva, we leave it in place. If not, then it must be removed, because this represents a periodontopathy and the deep gingival pocket or hood allows the pathogens - like a Trojan horse - to attack the middle germ layer, the bone, without maintaining the immunological protection of the outer germ layer, the keratinized gingiva. According to these fixed algorithms, you will be able to quickly decide which teeth will be removed, in which positions implants of what length and diameter will be planned, and what will be the extent of the long-term temporary. Of course, we will also show you the possible applications of special shapes such as sinus implants, balcony implants, shorty implants and oval implants. How do you proceed with simultaneous removal/therapy of infections, cysts or osteolytic areas? How do we place implants in bone class IV or in the rock-hard bone class I? What techniques do we use to be able to place an immediate implant even in an upper septal region, even if there is no bone between the alveoli? In this course we will also
FURTHER INFORMATION

focus on the most common mistakes in ceramic implantology that can lead to failure and how to avoid them. Because, as we all know, mistakes are the best way to learn. We will use many case studies to show you what you need to pay particular attention to. We also go into detail on the subject of complication management and how to react correctly if a complication occurs. This way you will be prepared for any situation. It is best to bring some OPG’s and DVT’s with you on a USB stick, so that you can plan these cases directly with our support. You will be especially impressed by the planning tool developed by Dr. Karl Ulrich Volz, which you will take home with you for your later planning! Hand on heart: hardly any dentist understands his own treatment and cost plans, so how is a patient supposed to understand what you have in mind for him? However, if you provide the patient with an animation of the treatment result, your "closing ratio" will increase massively. These animations will be created by you in minutes and will also serve as a perfect visual guide for yourself during the operation.

LEVEL 3 - SURGERY HANDS-ON COURSE
Now you are itching to use the basic and planning knowledge from the previous day to insert as many SDS implants as possible of the most varied geometries and all conceivable indications in the artificial jaw and to feel how the unique shape of the Dynamic Thread® almost magically finds its way into the bone that you have designated. There is no bumping during drilling, no slippage of the implant, no sticking, no spinning - the SDS implants simply „glide into place“ and you enjoy the experience of more than 20 years of ceramic implantology and thousands of surgery days, which have gone into the development of this system! On this first hands-on day, you will not only implant the simulated situations at your own workstation, which will be projected onto a 7 m wide LCD screen by the instructors using a clever camera technique, but you will also practice intelligent incision and suture techniques on special artificial jaws with imitation gingiva. These techniques help to maintain the blood supply and are minimally invasive, painless and swelling-free for the patient. Relief incisions and periosteal slits were eliminated from the program at SDS many years ago - because they leave and cause swelling, pain, scarring and destroy the blood supply, increasing the risk of complications. Instead, you will get to know the SOFT BRUSHING TECHNIQUE developed by Prof. Dr. Alain Simonpieri, which can stretch the flap up to 1.5 cm without damaging the periosteum!

Your successful and easy introduction to implantology with SDS is guaranteed by the use of a navigation template (Zingis®), which you will find in the „SDSBOX“. This enables drilling and placement in an ideal implant position by means of prior three-dimensional planning by a surgeon of the SWISS BIOHEALTH CLINIC.

You will also work with the new ad hoc navigation system, the SDSAIM - ANATOMICAL IMPLANTATION METHOD on the artificial jaw model, place implants in the edentulous maxilla in absolutely perfect and parallel positions and at the same time generate optimal distances between the implants, which are essential for filling the interdental spaces with healthy papillae.
LEVEL 4 - PROSTHODONTICS HANDS-ON COURSE
On this further hands-on course day, everything revolves around the prosthetic standards in connection with SDS implants, which include both the final restoration with zirconia crowns and the restoration with manually and digitally fabricated long-term temporaries. After you have learned all the essentials from the preparation of the abutment to the placement of the definitive crowns, we will focus in the second part on the fabrication of perfect temporaries for immediate loading, as these can at best secure the surgical result, but can also negatively influence it in the event of incorrect loading. You will use various manual techniques to fabricate high-quality long-term temporaries on the model made the day before. You will also be introduced to the fabrication and processing of digital CAD/CAM long-term temporaries. You will realize how important a parallel and perfect implant position is, because on this second practice day you will be able to fabricate an esthetically, and in terms of marginal fit and friction, perfect long-term temporary for the entire jaw in record time, which will provide you with completely new options for restoring the papillae and excellent esthetics in the subsequent surgery.

The particularly ingenious thing about these two practical hands-on course days is that you will take the models with the inserted implants and the long-term temporaries home with you and can use them later to educate your patients.

BOOKING INFORMATION
Places for the Surgical and Prosthodontics Hands-On Course are limited. This means that the people with booking of the whole week have priority.

As soon as the practical courses are booked, the individual levels will be released for booking. Our recommendation is to book the entire week with all levels in order to be able to take the maximum of knowledge with you. The direct entry into a higher level is only recommended if the participant is already an absolute expert on the previous level.

Please use the booking information on the following page to register via our website.

### SPECIAL OFFER: FALL BUNDLE 2022 for 4,150 €

The following single courses are included:
- Oct. 12th - 13th: SDS ALLINONE with Dr. Karl Ulrich Volz
- Oct. 14th - 15th: 2nd JOINT CONGRESS for CERAMIC IMPLANTOLOGY
- Oct. 14th: Exclusive JCCI White Night Party

A Savings of up to 200 €!*  

* compared to booking the items singularly
LEVEL 1 - SDSALL
You will find all the information you need on previous pages.

LEVEL 2 - CASE PLANNING
• X-ray and DVT analysis
• Possible applications of SDS implants
• Immediate or late implantation, diameter and lengths
• Special types: Sinus, Balcony, Shorty, Oval implant
• Creation of the planning animation for the patient
• Error analysis and complication management

LEVEL 3 - SURGERY HANDS-ON COURSE
• Incision and suture techniques on the artificial jaw
• The biological drilling protocol of SDS
• Implanting a wide range of indications and implant types on the artificial jaw
• SDSBOX Digital & Biological Workflow (2ingis®)
• Application of the parallel technique AIM

LEVEL 4 - PROSTHODONTICS HANDS-ON COURSE
• Prosthetic standards with SDS: from abutment preparation to crown insertion
• Insertion of the implant abutment and preparation
• Long-term temporaries fabrication with various manual techniques as well as digitally with CAD/CAM

DATES
Oct. 12-13 + 17-19, 2022 (English)
Oct. 11-12 + 16-18, 2023 (English)

COURSE HOURS
Daily from 9:00 a.m. - 5:00 p.m.

LEVEL 1
Dr. Karl Ulrich Volz

LEVEL 2
Dr. Rebekka Hueber/Dr. Tobias Steinherr

LEVEL 3
Moritz Kneer

LEVEL 4
Caroline Vollmann

COURSE FEE
3,300 € for Levels 1 - 4

BOOKING
The following QR code will take you directly to the registration via our website:
Become a master of zirconia prosthodontics on ceramic implants
SDSPRO USA
Half-day course
Oct. 5, 2022 - Orlando, FL
Oct. 7, 2022 - Houston, TX
Oct. 8, 2022 - La Jolla, CA

LEVEL 3
LEVEL 4
Oct. 26, 2022 - Switzerland
Oct. 27, 2022 - Switzerland

COURSE HOURS
Daily from 9:00 a.m. – 5:00 p.m.

LEVEL 3
Dr. Tobias Steinherr

LEVEL 4
Joachim Maier (MDT)

COURSE FEE
1,300 € - SBE Center Kreuzlingen, Switzerland
$475 - SDSPRO USA per half-day course

BOOKING INFORMATION
The levels three and four of the PROSTHODONTICS WEEK are the only two levels being offered with a simultaneous translation in English. Attendees booking the 2-day package will have priority over those booking only one of the levels.

### LEVEL 3 - GNATHOLOGY/OCLUSION
- Pathologies and dysfunctions
- Diagnoses and analyses
- Splint therapies
- Pre-surgical LTT planning and LTT-2
- Setting and testing bite positions (based on the ART method)

### LEVEL 4 - PROSTHETICS ON SDS IMPLANTS
- Smart LTT techniques for SDS implants
- Material, stability, absence of friction, occlusion
- Indication-based preprosthetic planning
- All-ceramic prosthetics on SDS implants
LEVEL 3 - GNATHOLOGY/OCCCLUSION

You have certainly also observed how the most diverse gnathological concepts have emerged in recent decades and then often receded into the background again! Most of them were too mechanistically oriented, like orthodox dentistry in general, and due to their complexity could only inspire a relatively small fan base in the long term. In 2022, however, you do not want to spend many weekends learning a new complex method, but rather to understand the interrelationships of temporomandibular joint pathologies as briefly and succinctly as possible in order to obtain sensible, simple and quick therapies as tools of the trade. This will enable you to avoid failures and to heal pathological TMJ situations of your patients within the framework of implantological treatment using the long-term temporaries LTT-1 and LTT-2. In some cases you will already relieve the temporomandibular joint preoperatively using simple splints and allow it to regenerate in the physiological position. You will be supported by THE SWISS BIOHEALTH CONCEPT that calls for the removal of all metals, all interference fields and all NICOs, as these are major stress factors for the temporomandibular joint muscles, enabling all structures and functions to heal much faster.

In some serious cases, you will do an extra round on the LTT-2, which is optimized for the healed implants and provides the prerequisite for a perfect prosthetic. You will learn simple and reproducible techniques to adjust the bite position and bite height. The SWISS BIOHEALTH CLINIC team has been working on this topic for many years. Our team of three oral surgeons and Dr. Karl Ulrich Volz handle the most complex cases in the clinic, and in this course will help you gain or return the joy and confidence in Gnathology. A visit to the ART FAST TRACK WEEK would bring additional benefits since you would be able to to adjust and check the bite position and height via the patient’s own muscular feedback system.

LEVEL 4 - PROSTHETICS ON SDS IMPLANTS

All’s well that ends well? The same goes for the final prosthetic you place on an implant. We would dare to guess, however, that, like us, you have been learning the hard way and have messed up one or two cases on the way!

Ceramic crowns and bridges follow their own laws. While they provide us with fantastic aesthetics and superior soft tissue compatibility, they can be exasperating. This especially holds true for ceramic implants, where the old prosthodontist’s saying “color and shape are defined by the bite ...!” certainly no longer applies. Rather, it is “all or nothing”—the prosthetic restoration must be reproducible and perfect the first time around. In order to ensure stability and soft tissue compatibility, we prefer a monolithic solution. Gone are the days when it was possible to grind in or fire implants onto the abutment. We demand nothing less than flawless marginal adaptation, no friction, perfect and balanced occlusion and outstanding aesthetics!

You will only achieve this if you pre-plan the prosthetic in cooperation with your dental technician, ensure the closest possible approximation to the ideal position using an LTT-1 (and sometimes even an LTT-2) and by using a system that ensures that the monolithic prosthetic fits perfectly at the final appointment. No one can teach you this better than Joachim Maier, the oral designer and master dental technician who, together with Dr. Karl Ulrich Volz, designed and fitted the world’s first zirconium oxide crowns and bridges more than twenty years ago. Ever since, the two have been working together and Joachim Maier has developed the field of zirconium oxide prosthetics to perfection and generated simple methods that are capable of meeting the high demands of SWISS BIOHEALTH patients in just a few sessions.

This level of the PROSTHODONTICS WEEK will ensure that your excellent surgical work becomes and remains positively visible!
Deepen your knowledge in the use of blood concentrates with the President of SBCB Prof. Dr. Shahram Ghanaati
Blood concentrates represent the main pillar of biologization in dentistry. In this webinar, blood will be presented as the source of regeneration and the basis of blood concentrates. In addition, different blood concentrate systems and thus the role of blood cells as well as plasma proteins for tissue regeneration will be presented in a didactically structured manner based on the phases of wound healing. With the presentation of the LSCC (Low Speed Centrifugation Concept), the indication-based application of solid and liquid blood concentrates is presented in a clinically relevant way.

Numerous illustrative animations bring you closer to the practical work with blood concentrates. The explanation of the structured blood collection techniques as well as the presentation of a workstation for the application of blood concentrates in practice are helpful steps so that after the webinar blood collection and application of blood concentrates lose their supposed complexity. This webinar will set the course for routine use of blood concentrates in practice.

The course fee includes a 50-page course script, which is available in the download area of the e-learning program.
NUTRITION DESIGN

Learn about the complex topic of nutrition with this comprehensive online course
Nutrition is one of the most emotional topics of all. After this online course, you will be able to further improve your surgical and aesthetic results by providing targeted perioperative nutritional advice to your patients.

Recent studies prove that the building blocks of protein, carbohydrates and fats that we get from food and supplements are critical to rapid healing, collagen production, bone metabolism, periodontal health and the prevention of complications and inflammation. But you personally will also significantly improve your own energy levels and appearance by understanding the nutrients and compounds in your food.

Dr. Dominik Nischwitz, bestselling author, biological dentist, athlete and one of the top biohackers around, deals with the topic of nutrition like no one else. He explains the absolute basics of developing a long-term, individual nutritional design with the goal of optimal health and performance.

The course fee includes the nutrition design booklet according to Dr. Dominik Nischwitz, which is available in the download area of the e-learning program.
NICO

This course informs you about the theoretical foundations of NICOs
NICO
In this online course, Dr. Dr. Johann Lechner teaches you the theoretical principles of NICO, as well as the knowledge for diagnosis and therapy of residual bone inflammation.

NICO - what does that mean?
Chronic inflammation in the jawbone is not uncommon. In most cases, these inflammatory foci result from old, not optimally healed tooth extraction wounds, tooth attachments or foreign bodies. The result is a chronic overstimulation of the autonomic nervous system with sometimes serious problems for the entire body. This is called NICO - Neuralgia Inducing Cavitation Osteonecrosis. In addition to root canal treatment, NICO is another massive interference field for the entire body, which often prevents the patient from a complete recovery.

The first part of the online course focuses on pre-cancerous and pre-inflammatory niches in the jawbone, while the second part scientifically reassesses the „jaw interference field“.

DATES
Recording - therefore bookable at any time

COURSE DURATION
approx. 150 minutes

INSTRUCTOR
Dr. Dr. Johann Lechner

COURSE FEE
200 €

BOOKING INFORMATION
The following QR code will take you directly to the registration via our website:
NEURAL THERAPY

This course is about the basics of neural therapy and interference fields
NEURAL THERAPY

Neural therapy belongs to the regulatory and retuning therapies. The aim of regulation therapy is to normalize malfunctions of the organism. Neural therapy uses the local anesthetic procaine to briefly decouple interference fields, such as an impacted tooth, and thus simulate a successful treatment by a planned removal of this tooth in advance. In a matter of seconds, a treatment result can thus be ensured even before therapy begins.

The prerequisite for a neural therapeutic treatment is the exact knowledge of the anatomy and neurophysiology, which Dr. med. Rainer Wander will explain to you with the following points:

• Basics of Neural Therapy
• Concept of focal interference field - latest findings
• Pathways of the interference field
• Interference field tooth: effect on the whole body
• Demonstrations/injection techniques in the head area

The course fee includes a 148-page course script, which is available in the download area of the e-learning program.

DATES
Recording - therefore bookable at any time

COURSE DURATION
approx. 65 minutes

INSTRUCTOR
Dr. med. Rainer Wander

COURSE FEE
120 €

BOOKING INFORMATION

CURRICULUM EXAMINATION
SPECIALIST IN BIOLOGICAL DENTISTRY AND CERAMIC IMPLANTS
This extremely high-level curriculum is recognized by the two societies ISMI International Society for Metalfree Implantology and IAOCI International Academy Of Ceramic Implantology. Passing the exam entitles you to use the title „Specialist in Biological Dentistry and Ceramic Implants“, which was recently confirmed by the Bavarian Chamber of Dentists.

The curriculum was developed in 2016 from the continuing education program of the SWISS BIOHEALTH EDUCATION Center. It consists of compulsory courses, 100 completed and documented ceramic implant cases and is concluded with a written and oral examination, which is administered by the ISMI e.V. board.

EXAM DATES
The examination will be held on Friday, October 14, 2022.

The curriculum is recognized by:

For more information visit our website www.swissdental solutions.com/en/curriculum or scan the following QR code:
GUIDELINES

COMPULSORY COURSES

• The Curriculum is composed of compulsory courses
• Previously attended certification courses at the SWISS BIOHEALTH EDUCATION CENTER are fully credited
• There is no time limit in which the Curriculum must be completed.

SUBMISSION OF CASE DOCUMENTATIONS (100 ceramic implants)

• A minimum of 100 completed and documented ceramic implants must be submitted
• The case documentation MUST be submitted as a photo book (at least DIN A4 format): X-ray/panorama (OPG) AND photos preoperative, postoperative and final prosthetics.
• 100% of the submitted cases must be prosthetically restored
• Minimum requirement: The implanted quadrant MUST be free of amalgam, metals and root-treated teeth
• Deadline for submitting the photo book: no later than 4 weeks before the exam date
• Admission to the examination takes place after review of the photo book and approval by the examination board
• The photo book can be ordered e.g. via the following website: www.cewe.de/cewe-fotobuch.html

WRITTEN EXAM

• The written exam consists of 89 multiple choice and open questions.
• The open questions must be answered cleanly and completely
• The total time of the written exam is 90 minutes
• The written exam is considered passed if at least 80% (164 points) are achieved
• During the courses at the SWISS BIOHEALTH EDUCATION CENTER all questions are intensively discussed
• The current documents of SDS Swiss Dental Solutions AG and SWISS BIOHEALTH® (THE SWISS BIOHEALTH CONCEPT®) contain all answers to the curriculu

BONUS POINTS: 10 ADDITIONAL POINTS WILL BE REWARDED FOR SUBMITTING A SCIENTIFIC PAPER

10 additional points can be achieved by submitting a scientific paper on a specific topic. This should be submitted as a PDF with a minimum length of 5 to a maximum of 10 DIN A4 pages and must contain at least 10 references from PubMed.de. The paper will then be made available to all users in the SLACK-Channel #documents. Please contact us in time if you are interested, so that we can provide you with appropriate topics (example: vitamin K2 and blood thinners). Deadline: 4 weeks before the exam

ORAL EXAM

• Questions about the submitted case documentation
• Questions about the questions from the written exam that were not answered, not answered correctly or not answered completely
Participate at the largest congress of its kind for ceramic implants at the SWISS BIOHEALTH EDUCATION CENTER
JOINT CONGRESS for CERAMIC IMPLANTOLOGY
Ceramic implants are receiving a rapidly growing number of enthusiastic “followers” who appreciate the positive immunological impact on patient health.

We invite you to the JOINT CONGRESS for CERAMIC IMPLANTOLOGY to educate yourself in the environment of 5 ceramic implant companies and several prestigious scientific organizations. You can expect some of the highest caliber international speakers!

In addition to exciting lectures, live surgeries with various ceramic implant systems will be performed in the SWISS BIOHEALTH CLINIC and will be directly broadcast. An industrial exhibition with leading associations and companies invites visitors to take an intensive and practical look at the subject of ceramic implantology.

SPEAKERS 2022
Prof. Dr. Florian Beuer MME
Prof. Dr. Dr. Shahram Ghanaati
Prof. Dr. Georgios E. Romanos, DDS, PhD
Dres. Markus & Mathias Sperlich
Prof. Dr. Wael Att
Prof. Dr. Tomas Albrektsson
Prof. Dr. James Rutkowski RPh, DMD, PhD
Dr. Walter Döring
Prof. Dr. Jörg Neugebauer
Dr. Karl Ulrich Volz

ATTENDANCE CATEGORIES
• 160 seats live and on-site
• 100 interactive ZOOM seats
• unlimited number of live stream seats

WHITE NIGHT
Exclusively for all participants of the JOINT CONGRESS for CERAMIC IMPLANTOLOGY, the legendary WHITE NIGHT PARTY, which by now has cult status, will take place again on Friday evening. DJ MattNautique, TOM X the SAX and a magician from Saint Tropez guarantee a „hot night“ on and off the dance floor.

DATES
Oct. 13–14, 2023 (3rd JCCI, Bilingual – DE-EN)

CONGRESS HOURS
9:00 a.m. – 5:00 p.m.

EVENT FEE
ZOOM 390 €
Live Stream 320 €

The White Night can be booked additionally for a flat rate of 120 €. The number of participants is limited. Participation only possible with pre-registration.

BOOKING
The following QR code will take you directly to the registration via our website:
Your stage at SDS as a future top speaker!
SDS NEW TALENT SPEAKER CONTEST
We would like to offer SDS users a stage to make their first experiences as speakers in a family-like environment. All those who are already SDS users and not older than 45 years can apply to be a speaker.

Are you a member of the SDS family, over 45 or younger and don’t want to speak? Then you are the perfect audience and a part of our jury. A crucial position: after all, you choose who is the most convincing speaker of the day and takes home an unbeatable prize.

THE PRIZE 2022
The most convincing speaker will accompany Dr. Karl Ulrich Volz to the USA in November 2022. A speaker slot at the ICOI WORLD CONGRESS together with Dr. Volz in Las Vegas is just the beginning. Furthermore, the SDS NEW TALENT will speak at the SDS ROADSHOW in San Antonio, Tampa Bay and Alexandria and also stay in the best hotels and make exciting contacts.

REGISTRATION 2022
Registrations for both categories can be made via the website. Based on the topic proposal, the final speakers are already selected. You can still register as part of the audience. All presentation and evaluation criteria can also be found on the website.

DATES
September 3, 2022 (only in German)
June 17, 2023 (Bilingual, GER-EN)

HOURS
9:00 a.m. - 5:30 p.m.
followed by an aperitif

COURSE FEE 2022
Speakers free of charge
Audience/Jury free of charge

BOOKING
The following QR code will take you directly to the registration via our website:
Registration
Registration for all training courses takes place exclusively via the registration forms on the website. Our GTC apply.

Address
The SWISS BIOHEALTH EDUCATION CENTER is located at Konstanzerstrasse 11 in the Swiss border town of Kreuzlingen on Lake Constance and is easily accessible by all means of transportation.

Parking
There are sufficient parking spaces available in the GARDEN CITY parking garage. The parking garage is located in the same building as the SWISS BIOHEALTH EDUCATION CENTER. Please pay attention to the signs! Parking in front of the building is not allowed. Illegally parked vehicles will be towed away for a fee.

Arrival by plane
The Zurich Airport (ZRH) is the nearest airport. The Kreuzlingen train station is directly connected to the airport, so you can take the train to Kreuzlingen directly from the airport. The train ride takes about one to one and a half hours. You can find the timetable at www.sbb.ch.

Taxi
You can book a private transfer from/to the airport for example on the following website:
www.ziil-taxi.ch

Arrival by train
The Kreuzlingen train station is only 100 meters away and can be reached within three minutes through an underpass.

Continuing Education Credits (Europe only)
You will receive continuing education credits for attending a course. Points are awarded exclusively on the basis of the criteria established by “Continuing Education Points BZÄK/DGZMK”.

Cancellation
A written withdrawal from any training is possible up to 4 weeks before the start of any course or event. In this case, an administrative fee of 50 € will be charged.

In case of cancellation 4 weeks or less before a booked WEEK or DAYS course, a cancellation fee of 200 € is due; 14 days or less: 500 €; 7 days or less before the start of the training: 1,000 €. In case of cancellation 4 weeks or less before a course or conference, a cancellation fee of 50 €/course is due; 14 days or less: 200 €/course; 7 days or less before the start of the training: 300 €/course. In case of a no-show, the course fees are forfeited. The booked place is of course transferable to a substitute participant.

Dr. Karl Ulrich Volz

1. Scan QR code
2. Save contact of Dr. Volz
3. Save own V-Card with number and name
4. Send this V-Card to Dr. Volz and be placed on the list

**SDSPOD**
In our SDS PODCASTS you can easily deepen your expertise and industry understanding on the side:

**ZOOM CONFERENCES**
Our ZOOM conferences expand your knowledge broadly, you will always find out about the next conference via the newsletter and the broadcast list.
COMMUNITY PLATFORM SLACK

Share ideas with other professionals like yourself online!

GET THE LINK, REGISTER & JOIN THE DISCUSSION
How to use „SLACK“? Step by step:
- Request your invitation from the support-team
- Download the app from the App or Playstore
- Activate within 48 hours
- Set up your profile
- Share your experiences
- Follow netiquette

CREATE PROFILE
- Upload photo
- Last name, first name
- Dentist/Oral surgeon/OMS, City

FIRST STEPS
1. You are in the group User Family
2. Choose the Channel, which fits to your request, e.g. #medical-questions
3. In this selected channel you will find individual Threads, i.e. the starting points for various topics e.g. NICO-STUDY with PROF. GHANAATI
4. You can create your own Threads - with short titles with capital letters
5. You can also comment on existing threads with text and images

Tips and references:
- For more tips, check out #slack-tutorials
- For clarity, the individual layers must be respected accordingly
